According to the our remote viewers;

- Most probable crash cause is terrorist attack
- Low possibility technical error or fire/sudden explosion

And also we obtained description of the persons, possible terrorist,

- During the flight, one person entered to the cockpit (please see drawing of person)
- Description: Long-face, middle-aged, pale face, frontal baldness which is on the right side, as if it had burned scalp and the dimple on his right cheek wrinkles, tall techies, technical man. Calm, like black and white checkered plaid jacket that are available. Snap thin lips. The young pilot was very scared. Possible problem comes from this person. Please see our drawing, below:

Possible landed/crashed locations, obtained common key words

- - Large water channel like as V-shape
- - V-shape may be in the river or near lake
- - Airplane covered large forest or another shield
- - Near big and sole/single island, may be mentioned V-shaped river on this island
- - Airplane near to the spore/game hall, covered by large glasses
